AHN Welcomes New Faculty Member, Garrett Combs

Please join me in welcoming Mr. Garrett Combs to Academy of the Holy Names as our new High School Mathematics Teacher. Garrett holds a Master of Arts in Teaching Mathematics from SUNY Empire State College and Bachelor of Science in Meteorology from Lyndon State College and brings several years of teaching experience in both mathematics and science. Most recently, he was at Doane Stuart School, where he taught courses ranging from Pre-Algebra through Pre-Calculus, as well as Physics, Meteorology, and other science courses.

Mr. Combs believes students learn and grow in different ways and that building strong relationships is essential to helping them develop confidence in their abilities. He is committed to meeting students where they are academically while providing meaningful challenges that encourage growth, curiosity, and independence. He also enjoys connecting mathematics to real-world applications, helping students understand not only how mathematical concepts work, but why they matter.

At Holy Names, Mr. Combs will teach Geometry, Financial Algebra, Pre-Calculus, and Computers and Technology. His broad teaching experience, interest in curriculum development, and appreciation for the connections between mathematics, science, and everyday life will be valuable assets to our academic program. He also brings experience contributing to school life beyond the classroom, including having served as Doane's Dance Committee faculty advisor among other extracurricular contributions.

We are excited to welcome Mr. Combs to the Holy Names community and look forward to the contributions he will make to our students' academic and personal growth. Please join me in welcoming him to AHN!
